

Please do not rule in favor of greater monopolization of the country's airwaves. Doing so would go against the interests of the vast majority of the public in favor of a handful of rich and powerful corporations. In addition, the process to date around this rulemaking has been highly undemocratic. This country is supposed to be a democracy. Please open up and extend the process so the general public can actually see what's going on and can have some significant input into a decision that will greatly affect all of our lives. If the board cannot bring itself to do this, it is time for the board majority to step down.
